

Recent decisions made by the current commissioners favor deregulation of monopolies, resulting in fewer choices for consumers such as myself. Verizon is currently the only company able to offer the telephony side of broadband access such as DSL in Hawaii. I do NOT want to use Verizon, the current ISP I have provides much better service than verizon does. I would not like to see this passed at all, but the state should at least be able to have some say in the matter if it does pass.
